

# Seminar on “Performance assessment of forest-based climate change mitigation initiatives”

**11:00h – 14:30h on Friday January 17th 2020 at Wageningen University**

**Location: room Lumen 1, Lumen building, Droevendaalsesteeg 3a (building 100), Wageningen**

The central role of forests in climate change mitigation efforts makes it important to evaluate these forest-based efforts in terms of carbon effectiveness and social synergies and trade-offs. The aim of the seminar is to present and discuss different perspectives on performance assessment of forest-based climate change mitigation initiatives. The workshop precedes the PhD thesis defence of Astrid Bos at 16:00h that same day. You are also invited to attend the public defence of the thesis in the Aula.

## Agenda

Time	Subject	Speaker
11:00	Introduction	Prof. Martin Herold, Niki De Sy (Wageningen University, NL)
11:05	The nuts and bolts of implementing REDD+ at the jurisdictional scale	Dr. Alex Lotsch (World bank Forest Carbon Partnership Facility, Vietnam)
11:35	Result-based payments: a good idea, can it also be implemented?	Prof. Arild Angelsen (Norwegian University of Life Sciences, Norway)
12:05	Ecosystem accounting to assess forest carbon and co-benefits	Prof. Lars Hein (Wageningen University, NL)
12:35 – 13:30 Lunch		
13:30	Integrative animal and environmental governance	Prof. Ingrid Visseren-Hamakers (Radboud University Nijmegen, NL)
14:00	Understanding what works in forest-based climate change mitigation	Dr. Amy Duchelle (Centre for International Forestry Research Indonesia, Indonesia)

Participation is free of charge, but registration is required to order the lunch. For registration, please send an email to Antoinette Stoffers ([Antoinette.Stoffers@wur.nl](mailto:Antoinette.Stoffers@wur.nl)), preferable before Wednesday January 15<sup>th</sup>.

We are looking forward to your participation!
